

The batteries in your calculator ran out with one minute to go on a timed math test. Choose the correct answer to your two remaining questions using mental math. Say how you arrived at your answer

59. $89 \times 4,231$

- a.) 32,459
- b.) 273,889
- c.) 374,824
- d.) 376, 559

60. $339 \div (2/3)$

- a.) 224
- b.) $412.\bar{3}$
- c.) 508.5

The batteries in your calculator ran out with one minute to go on a timed math test. Choose the correct answer to your two remaining questions using mental math. Say how you arrived at your answer

59. $89 \times 4,231$

- a.) 32,459
- b.) 273,889
- c.) 374,824
- d.) 376, 559

The answer must be 6 digits long (eliminate a)/end in a 9 (eliminate c)/ $90 \times 4,000 = 36,000$ (eliminate b) Answer: d

60. $339 \div (2/3)$

- a.) 224
- b.) $412.\bar{3}$
- c.) 508.5

The answer is not a whole number (eliminate a)/ends in a .5 (eliminate b) Answer: c
