

Does your family garden? If so: who, what, where? Be prepared to share your family gardening story. If not, what are your favorite fruits and vegetables? And, what does gardening have to do with STEM?

Share your family gardening stories,
favorite fruits and veggies. . .

STEM = science, technology, engineering and math

Some possible **science** connections = horticulture, plant biology, soil, insects, pathogens, pollination, fertilizers, fungi, plant and animal coevolution, genetics

Technology = garden design with CAD, gardening tools

Engineering = automatic watering systems, design of fencing, sheds and raised bed gardens

Math = setting up the garden with measuring for growth sizes and maximum yields, planning for ripening & picking
