

Data collection is an important part of problem solving. What do you need to know in order to find out...

The average speed on your trip from Chicago to Los Angeles?

The daily average amount of data each person in a family used this month?

The rate the temperature increased during the morning hours?

Data collection is an important part of problem solving. What do you need to know in order to find out...

The average speed on your trip from Chicago to Los Angeles? *Departure time, arrival time, the distance travelled, any layovers or overnight stays*

The daily average amount of data each person in a family used this month? *The number of members of the family, the number of days in the month, the amount of data used*

The rate the temperature increased during the morning hours? *Starting time and temperature, stopping time and temperature*
