The numbers in each column of the table relate to each other in a certain way. Can you fill in the missing numbers?

| 5 | 8 | 7 |  |  |  | 10 |  | 14 | 15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | 4 | 5 | 3 | 7 |  | 6 | 5 |  |  |
| 3 | 4 | 2 | 4 | 6 | 9 |  | 8 |  |  |
| 6 | 16 | 10 |  |  | 36 |  |  | 49 | 56 |

Now it's your turn. Add two more of your own columns that follow the same relationship. Explain in words how you got your numbers.

The numbers in each column of the table relate to each other in a certain way. Can you fill in the missing numbers?

| 5 | 8 | 7 | 7 | 13 | 13 | 10 | 13 | 14 | 15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | 4 | 5 | 3 | 7 | 4 | 6 | 5 | 7 | 7 |
| 3 | 4 | 2 | 4 | 6 | 9 | 4 | 8 | 7 | Note: these <br> two entries <br> may be in any <br> order. |
| 6 | 16 | 10 | 12 | 42 | 36 | 24 | 40 | 49 | 56 |

Now it's your turn. Add two more of your own columns that follow the same relationship.
There are an infinite number of possibilities. The top number must be the sum of the middle two and the bottom the multiple of the middle two.
