

This is Moxi, a robot that works at Edward Hospital in Naperville. Delivering prescription medications to different departments around the building, at present, it needs a human to maneuver through the elevator system. If you had a robot at you house, list 2 chores you'd like to program it to do. Think of a challenge you would encounter for programming each chore.

Answers will vary

Ex: Program it to empty the dishwasher. You will have to program it to know what type of item goes where (pots versus drinking glasses).

Ex: Clean your bedroom on the 2nd floor of the house. How will it get up and down stairs?
