

The Cicadas of 2024 are here in full force

Mid-May, in DuPage County, the soil conditions were just right (64° 8" underground) for the nymphs to emerge, molt, eat, then mate and die.

***When were these 17 year periodical cicadas last here, above ground?**

***And when do we next expect the nymphs produced during this invasion to reappear from their underground habitats and complete their life cycle?**

***Have you seen many around your house? Your neighborhood?**

***Do you have a cicada story from this emergence?**

The Cicadas of 2024 are here in full force

*When were these 17 year periodical cicadas last here, above ground?

2024 - 17 = 2007

*And when do we next expect the nymphs produced during this invasion to reappear from their underground habitats and complete their life cycle?

2024 + 17 = 2041

*Have you seen many around your house? Your neighborhood?

*Do you have a cicada story from this emergence?
