# Look at this DIY Rain Barrel diagram and answer the questions.

## Why are there two barrels?

To hold more water

## Why are there two spigots?

One for a hose the other for a container

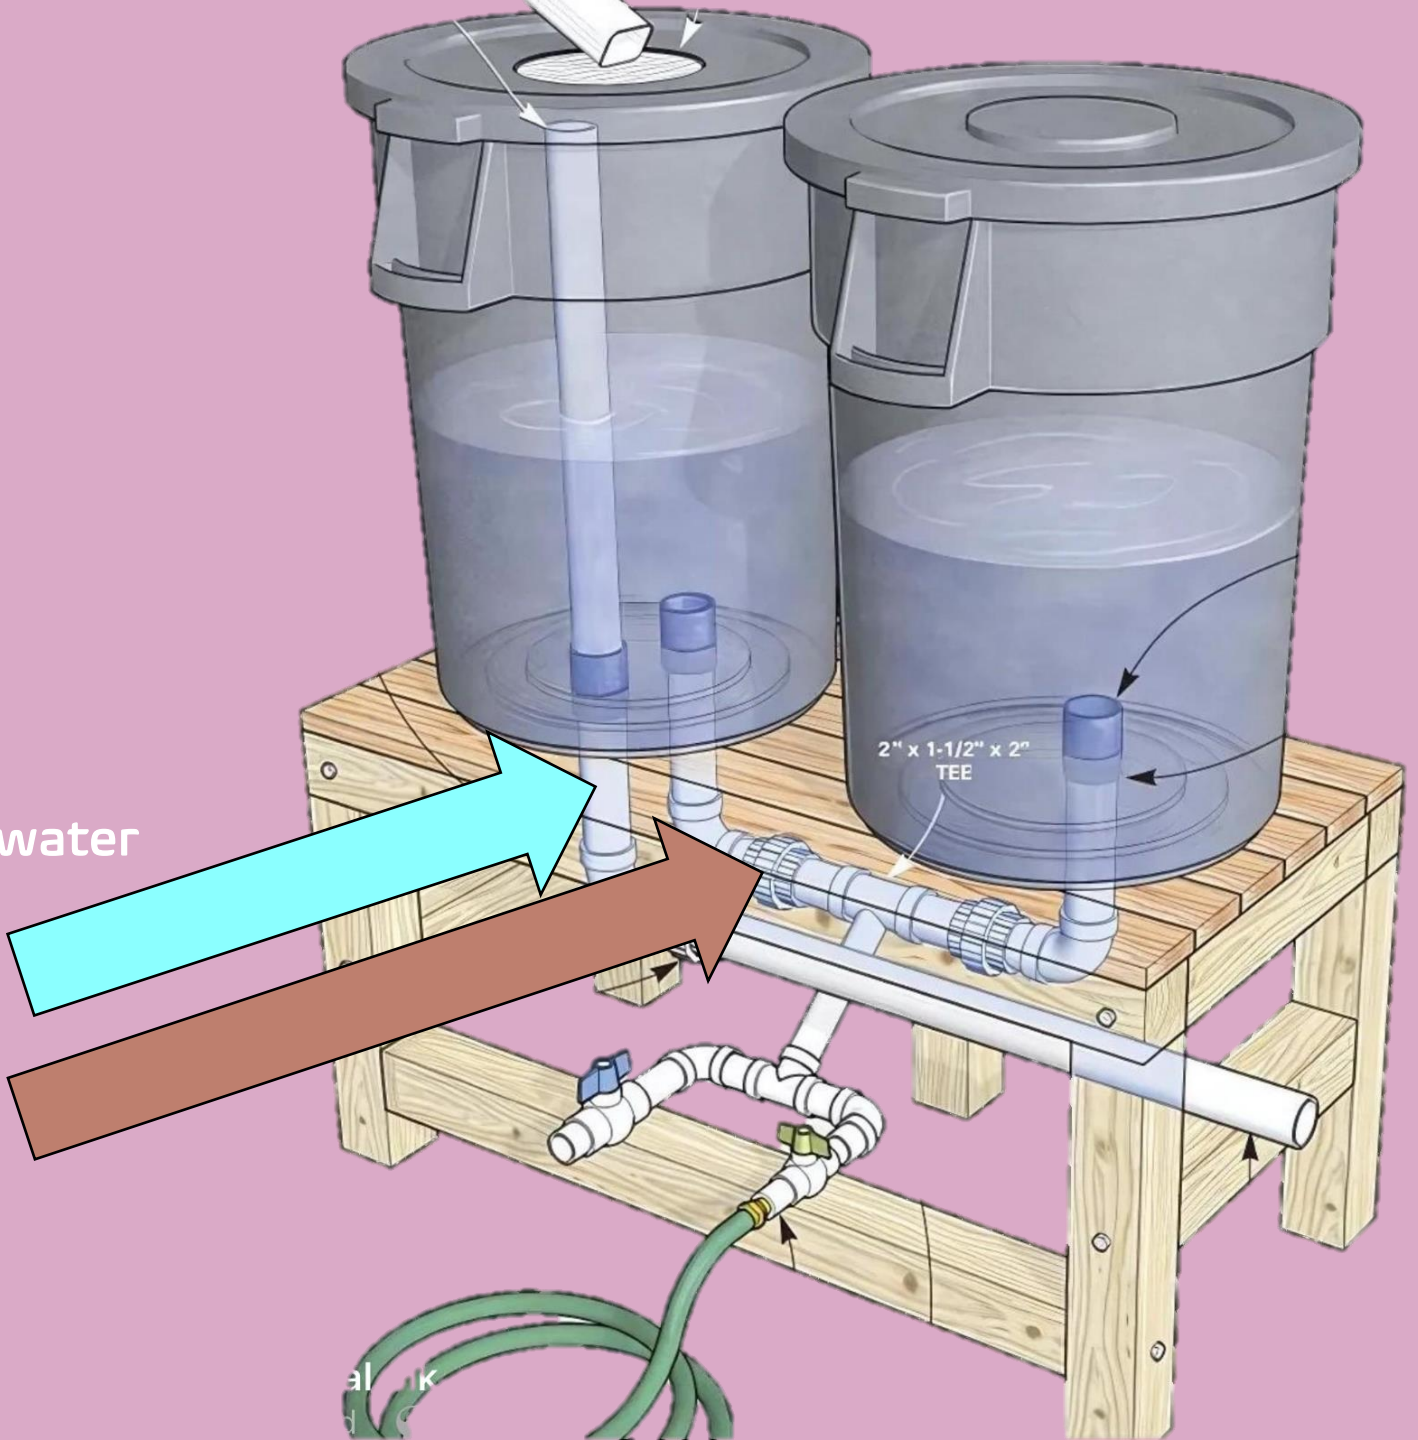
## Which barrel will fill first?

They both will fill at the same rate after the water clears the mouth of the connecting pipe

## Why do they need this pipe?

To drain any overflow

## Why do they need this pipe? (two reasons)

It ensures that the two fill simultaneously


To direct the water to the spigots
