

CREATE A CUP

1. Obtain a piece of 8.5" x 11" plain paper, no holes.
2. Fold it into a container that can hold 15 ml, ~1 tbsp, of water, for at least 20 seconds, without any dripping.
3. Share your creation.
4. Time permitting, improve it! That is, hold more water and/or for a longer time.

Hopefully you have time to share solutions.

If you need inspiration, one idea is to search “origami cup.”
